

Project Requirements Document

Functional Requirements

- User-Friendly Interface: Intuitive, easy-to-navigate interface for web and mobile, accommodating various devices and user preferences.
- Registration and Profile Management: Secure registration and profile functionalities with verification for community members.
- Food Listing and Matching System: System for donors to list surplus food and recipients to search or claim items.
- Real-Time Notifications: Alert system for new listings, matches, and updates.
- Impact Tracking and Reporting: Features to log key metrics like meals donated, and generate reports.
- Multilingual Support: Support multiple languages initially including English, Spanish, French, and Mandarin.

Non-Functional Requirements

- Scalability and Performance: Handle growing number of users without performance compromise.
- Security and Data Privacy: Robust measures to protect data and comply with regulations like GDPR.
- Integration with Third-Party Services: Integration with services like mapping tools and social media.

Usability Requirements

- Interactive Tutorials: Guide new users through processes with pop-ups or a chatbot.
- Simplified Sign-up Process: Minimal initial information required for quick registration.

Marketing Requirements

- Targeted Marketing Campaigns: Focused campaigns for specific segments like sustainability-minded restaurants.
- Incentives for Early Adopters: Recognition badges or featured spots for early adopters.
- Success Story Spotlights: Use real success stories in marketing to demonstrate impact.

Operational Requirements

- User Support and Training: Assist with onboarding and navigation through FAQs and training materials.
- Global Expansion: Launch initially in 10 major cities with plans for further expansion.
